

## How to Remove Protective Film From Mirrors

Your GhostBlind comes with a protective film on the front of the mirrors that must be removed.

**Hint:** Do not leave the blind in the direct sunlight or in excessive heat before removing the protective film. Heat may cause the adhesive to stick to the mirror surface.

It is best to lay the blind flat on the floor with the mirror side up. The protective film should come off easily. **Do NOT kneel on the blind**

If you have a hard time getting the edge of the film started, use scotch tape, masking tape, duct tape or any aggressive tape as shown.

**Thank You!**
