

The Octagon Box Blind Kit

Questions & Answers:

Is there a warranty on The Octagon Blind Kit?

We have a limited two year warranty on **The Octagon Blind Kit** and related accessories that we sell to the original purchaser. We will replace or repair at our discretion, any part that fails due to faulty materials and/or workmanship. The warranty does not cover improper use, damage caused by improperly securing the blind to the ground or your platform, items falling on the blind or fading from the sun. Contact GhostBlind Industries directly at 877-751-4868 for any warranty questions. Do not return blind to us or any stores once blind has been assembled.

What is life expectancy of The Octagon Blind Kit?

The Octagon Blind Kit should last many years. The length of life is related to local weather and varies in different geographical locations. The plastic construction is waterproof, but all plastic material eventually degrades outdoors over time and becomes brittle due to the UV rays in the sunlight. Therefore, the less direct sunlight on the plastic, the longer it last. You can extend the life expectancy by applying a coat of paint after the first year or covering your blind with a tarp in the off season. You may need to replace the zip ties around the roof edge every couple years.

What is The Octagon Blind Kit made of and is it weather proof?

The corrugated plastic panels are extruded from chemical resistant and waterproof virgin polypropylene, making them an ideal choice for numerous outdoor, commercial and industrial applications. Virgin polypropylene is ideal for low temperatures. We have tested the hinges at minus 40°F.

Is The Octagon Blind Kit insulated?

The fluted wall construction has an air gap between the front and back faces. Some customers have used a small propane heater in **The Octagon Blind Kit** when it is extremely cold and have reported an increase of 40°F with the outside air temperature of 20°F. The fluted wall panel construction works very well to keep the wind off you.

Is it possible to paint The Octagon Blind Kit?

Yes. However, you should wait until 1 year for the plastic panels to age for the paint to adhere better. Use plastic type paint.

Do you sell replacement parts?

Yes, if some part of The Octagon Blind Kit has been damaged, we can provide a replacement. Parts damaged due to a manufacturing defect will be replaced at no charge for the first 2 years. Warranty excludes shipping.
